SecurityMan Debuts SolarPIR™ for DIY Green Security

SolarPIR™ is a simple and energy efficient indoor motion detection alarm for homes and businesses

Most people nowadays find that “going green” is something they must do. So why not include your security products? It’s time to go green with the SecurityMan simple and affordable **SolarPIR™** for your home security. This motion detection driven alarm can be used to help protect your home and business at a minimum investment. It features an energy saving solar panel used to recycle indoor lighting (100+ Lux) as a source of power to help conserve and extend the backup battery life (3xAA not included) to up to three years. When motion is detected, this unit will emit a 130dB siren for 30 second which can only be disabled by a 4 digit programmable user’s code. Its stylish, compact design allows it to blend in with any décor and because it requires no wiring, you can take this portable alarm system with you wherever you go.

SolarPIR™ MSRP is only \$29.99, with a one-year limited warranty. For more information or details of this product, please visit http://www.securitymaninc.com/?page_id=527

SolarPIR™ key features and specifications:

- D.I.Y. (do-it-yourself) installation
- Can be wall mounted or set on a desk top or shelf
- PIR motion detection coverage: up to 8m (26 ft)/40° horizontal; 6m (20ft)/75° horizontal
- Pet immunity weight: ≤5 Kg (11 lbs) to reduce false alarm
- Energy efficient with solar panel and backup batteries (3xAA, not included)
- Ultra alarm sound 130dB for average home coverage
- 30 seconds exit delay and 5 seconds entry delay
- Programmable 4-digit security code
- Low battery LED indicator
- Low power consumption design with stand by current at 20 μ A
- Minimum lighting level for solar panel: 100 Lux
- Dimensions: 70 (W) x 116 (H) x 33mm (D) (2.75" x 45.67" x 1.30")

SecurityMan Debuts SM-3803 for DIY Green Security

SM-3803 is a simple solar powered dummy camera for homes and businesses

Simply go green with the SecurityMan **SM-3803** dummy camera. It looks like a professional security camera and helps to increase security presence of your home or business at a fraction of the cost of a real security camera. It features an energy saving solar panel design with backup batteries (2xAAA not included) and a flashing red LED light to help increase the real security camera presence. The built-in solar panel will recycle indoor lights (100+ Lux) as its main source for power, and use the backup batteries during low light levels. With this energy saving "go green" design, the two AAA batteries can last up to three years instead of one, or simply

replace conventional one time use batteries with rechargeable batteries for long time usage. The **SM-3803** can be mixed with real cameras or used individually to increase security presence anywhere.

SM-3803 MSRP is only \$29.99, with a one-year limited warranty. For more information or details of this product, please visit http://www.securitymaninc.com/?page_id=2245

Package includes:

- Dummy camera with LED
