

FlashDVR

Waterproof Digital Video Recorder with LED Flashlight

SecurityMan FlashDVR is a smart flashlight with built-in color camera for video recording and 4GB memory of storage. It is a portable flashlight DVR recorder ideal for daytime recording, nighttime recording, and under water recording (submergible up to 10m). Easy access to recorded video files with USB interface to any personal computer to view, edit, and playback footages. It is a great companion for drivers, bikers, campers, hunters, scuba divers, cavers, hikers, and security guards.

Features:

- Sporty flashlight design with color camera built-in
- Crystal clear VGA quality with date and time stamp
- Strong lighting LED matrix for illumination in dark areas
- Submergible up to 10m (33ft) underwater
- Underwater “Lock” switch to prevent controls from the impact of water pressure
- Rechargeable Li-battery battery for 4/8 hours usage (record with flashlight on / record w/o flashlight)
- Built-in 4GB of memory up to 2hrs of record time, records in AVI file format
- Mini USB 2.0 interface, connect to a PC for playback and download
- Easy mounting brackets for hat and bike

Package Includes:

- 1 x Flashlight DVR
- 1 x Adventure Hat Bracket
- 1 x Bike Bracket
- 1 x Power Adapter/Charger
- 1 x USB Cable
- 1 x Lanyard
- 1 x User’s Manual
- 1 x Plectrum
