- Avoid using two or more USB and PCI video capture devices on the hosting computer.

iCamDVR1W

1 wireless camera system for video recording and remote monitoring from PC

Camera(SM-302TX) and Receiver(SM-302RX) Setup

1. Find a suitable location about 10~15ft away from the receiver and plug in the power adapter for a quick test prior to mounting the camera. Connect the adapter plug (DC 8V 300mA) to the camera, the other end to AC electricity outlet, as shown above.
2. Connect one end of AV (red, yellow) cable to receiver, other end into the video/audio inputs of the iCamDVR, as shown in step 4 below. Then connect adapter plug (DC8V 300mA) to receiver's power jack, as illustrated above.

3. Press the Power ON/OFF button located on the front panel of the receiver and the CH1 indicator lights up green.
4. Connect the AV cable to the iCamDVR video and audio input, match yellow to yellow and red to white.

Note: CH2 indicator light, CH button, #1/#2 dip switch, and ML dip switch is not in use and are not designed for this model of receiver.
